

**The semiotic textological analysis of Sándor Márai's short text
"Az ünnepekről" [About holidays]**

In my study, I illustrate, via the analysis of Sándor Márai's short text, "*Az ünnepekről*", with what information the system of meaning planes interpreted in the context of semiotic textology contributes to the representation of the meaning of the text. The theoretical framework of meaning analysis is comprised by semiotic textology. In the representation of meaning, the interpreter of the text (and, obviously, its creator) is present as a unique mental content or as a unique mental function. Therefore, the bases of knowledge of the interpreter and the type of interpretation play an important role in the representation of the meaning of the text.

Keywords: *meaning analysis, semiotic textology, knowledge base*
